Guidelines for ConvoHTML

Welcome to ConvoHTML! This guide will help you get started with our simplified markup language for creating web pages.

1. Introduction

ConvoHTML is designed to offer an intuitive and straightforward way to write HTML-like markup. Use this syntax to create web pages efficiently.

2. Basic Syntax

Here is the basic syntax for writing ConvoHTML:

- **Navigation Bar**:
  - Syntax: `nav`
  - Example:
    ```convo
    nav
    ```

  - Description: Defines the navigation bar section.

- **Hero Section**:
  - Syntax: `hero`
  - Example:
    ```convo
    hero
      text: Welcome to My Website
    ```

  - Description: Defines the hero section with optional background image.

- **Features Section**:
  - Syntax: `features`
  - Example:
    ```convo
    features
      text: Feature 1
      text: Feature 2
    ```

  - Description: Lists features of the website.

- **Footer Section**:
  - Syntax: `footer`
  - Example:
    ```convo
    footer
      text: Contact Us
    ```

  - Description: Defines the footer of the website.

- **Text Content**:
  - Syntax: `text: [Content]`
  - Example:
    ```convo
    text: Hello World
    ```

  - Description: Adds text content.

- **Buttons**:
  - Syntax: `button: [Label]`
  - Example:
    ```convo
    button: Click Me
    ```

  - Description: Adds a button with a label.

- **Icons**:
  - Syntax: `icon: [ClassName]`
  - Example:
    ```convo
    icon: fa fa-star
    ```

  - Description: Adds an icon with a specified class.

3. Special Cases

- **Background Image for Hero Section**:
  - Add `bg-image` to `hero` section.
  - Example:

```convo
hero: bg-image
```

4. Advanced Features

- **CSS Styling**:
  - Use the `<style>` tag to include CSS within your ConvoHTML code.
  - Example:
    ```convo
    <style>
      .hero {
        background-color: lightblue;
      }
    </style>
    ```

5. Tips and Troubleshooting

- Ensure that every section starts and ends properly to avoid rendering issues.
- Use descriptive text and button labels to make your website user-friendly.
- For errors, check that all tags are properly closed and all syntax follows the guidelines.
